A photograph of a man with glasses and a grey shirt sitting at a table, smiling and looking towards the left. He is surrounded by other people, including a woman in a red top on the right and a man in a blue shirt on the left. The background shows a modern office or meeting space with large windows and glass partitions. The text is overlaid on the left side of the image.

Why Arxus chose to partner with BNIX

A tale of two clouds

Erlend Schenkels

Managing Partner, Arxus

Arxus in a nutshell

A **Managed Cloud Service Provider** made of up 50+ cloud enthusiasts.
An **“Azure First”-approach** in a hybrid world.

Founded in 2008. (Over a decade of experience delivering custom made solutions.)

Offices in Kontich & Lummen, but working in and from the cloud.

A team of 50+ enthusiastic cloud experts and +500 customers.

We are part of De Cronos Groep, a diverse collection of innovative IT businesses.

Certified teams providing tailored Azure and Microsoft 365 solutions.

Focused on creating long-term partnerships to build truly future-proofed business.

Our goal? Let customers focus on their **core business**

- We know that every company says that nowadays. But **we bring it into practice.**
- We **guarantee** that the cloud environment of our customers is fully taken care of.
- We provide the **management and maintenance of their infrastructure.** Including optimal performance and security, as well as **local support.**

Our biggest **added value?** **Azure managed services**

- We offer managed services on both our **Cronos private cloud** and on **Azure public cloud** as well.
- We **completely rebuilt these from the ground up**, to fit the opportunities the Azure cloud offers in terms of management, maintenance, monitoring, security and automation.
- The result is Azure managed services: a **future-proof managed service offering**.

Why **Azure** is our first choice?

- As an **open and flexible platform**, Azure enables us to quickly build, deploy, manage, and scale cloud infrastructure to meet your needs.
- It will **future-proof** a business and empower employees to operate efficiently, helping them to **stand out from the competition**.
- 70+ compliance offerings, security embedded at every phase of development, continuous updates... that makes Azure the **secure cloud platform** option.

But solid solutions in **private & hybrid cloud** as well...

- A strong footprint in **3 Belgian Tier 3+ datacenters**. This allows us to offer full redundant private & hybrid cloud solutions.
- Guarantee that **customer data** permanently **remains in Belgium**, combined with an **ISO 27001 certificate** for data protection. This results in top-level privacy & security measures.
- We offer a lot of hands-on expertise in **hybrid cloud architecture**.

Where does **BNIX** fit in this story?

Since we're operating in a hybrid world, this is **a tale of two clouds.**

The partnership with BNIX offers us **interesting advantages** for both our private Cronos cloud as for our Azure public cloud.

BNIX and our **hybrid cloud**

Low-latency & fast network access to Azure Public Cloud

Sufficient bandwidth for efficient migrations to Azure Public Cloud

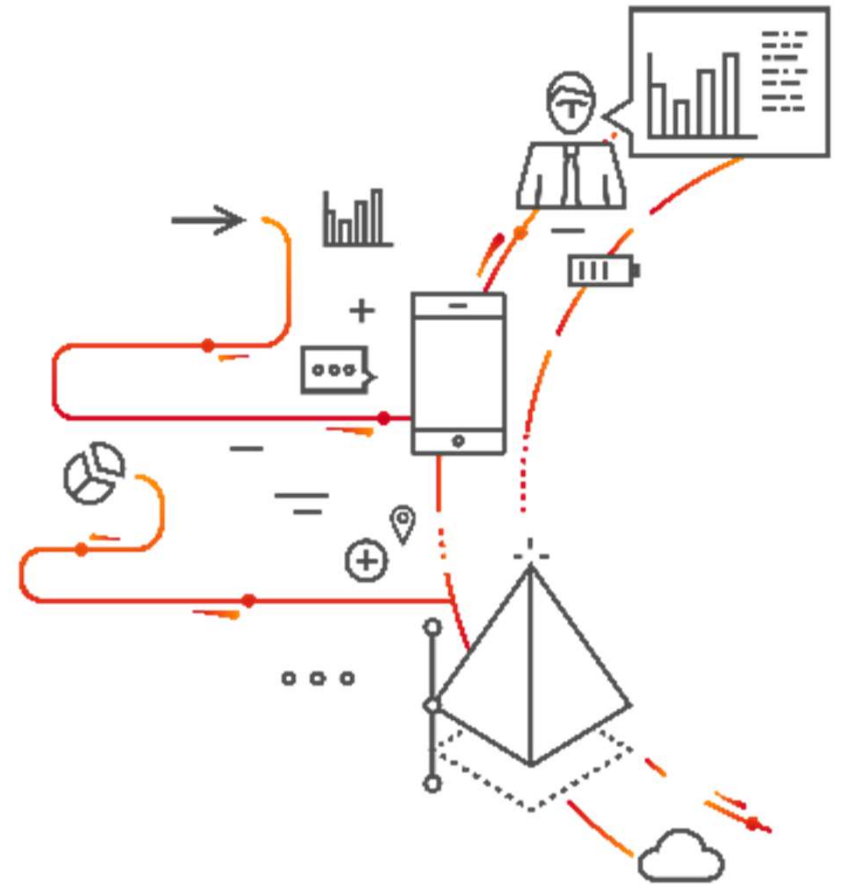

Directly exchange traffic with all other BNIX members

High-speed connection with large CDN's as Akamai, Cloudflare, etc.

(we love to add Telenet & Proximus too)

Ready to embrace business first cloud solutions?

Get in contact and we'll have an Arxus expert reach out to answer any questions and get the ball rolling.

Message us at info@arxus.eu to find out more about how we can help your start-up on the path to success.
